Career Objective

Motivated Computer Science undergraduate with a strong interest in Front-End Development, Data Analytics, and Agentic AI. Skilled in developing responsive web applications, building interactive dashboards, and creating AI-powered solutions. Seeking an opportunity to contribute to innovative projects while continuously enhancing my technical expertise and problem-solving abilities.

Education

B.E. Computer Science and Engineering
K.S. Rangasamy College of Technology 2023–2027
CGPA: 7.47

Technical Skills

Frontend: HTML, CSS, JavaScript
Languages: Python, C
Database: MongoDB, MySQL
Tools: Git, GitHub, Figma, Salesforce CRM, UI/UX

Projects

AI College Appointment Assistant

- Developed an AI-powered appointment scheduling assistant using Agentic AI concepts, enabling natural language interactions between students and faculty.
- Integrated MongoDB-backed scheduling with automated conflict detection to efficiently manage appointments and prevent double bookings.

Road Accident Analysis Dashboard

- Built an interactive Power BI dashboard to analyze road accident data using KPI cards, charts, and geographic visualizations.
- Performed data cleaning, transformation, and visualization to identify accident trends and generate actionable insights.

Online Book Store

- Developed a responsive e-commerce website featuring user authentication, shopping cart functionality, and an intuitive user interface.
- Implemented LocalStorage, form validation, and a UPI payment interface to improve user experience and ensure seamless data persistence.

Certifications

- Graphics Designing - Skill Academia.
- Website Designing - Skill Academia.
- UI/UX Design - Skill Academia.
- Digital Marketing Fundamentals - NASSCOM
